## Digital Transformation Journey In The Enterprise

Cloud technology is creating new industries, methods, and models that accelerate innovation. New technologies such as data analytics, artificial intelligence, mobility, and social networks have changed how people communicate and collaborate daily.

This workshop will examine technological trends and ways in which policy makers, business owners and industry leaders can use innovative frameworks to meet new customer demands. In addition, speakers will explore and deliberate how cloud adoption in an enterprise can change tomorrow's workforce today.

*We look forward to seeing you!*

*Best Regards,*
