

UNLOCKING THE POTENTIAL OF INDUSTRY 4.0

Industry 4.0 is the systemic transformation of manufacturing enabled by the convergence of physical-digital systems to improve quality, lower costs, and increase efficiency. The manufacturing world today stands at the brink of this physical and digital convergence, and factories of today are about connectivity that enables companies to monitor assets, predict failures thereby bringing massive productivity gains for manufacturers.

In this session, you will get deeper insights on what are the technology imperatives at the core of this manufacturing transformation and how PTC technology solutions will help companies realize the potential of Industry 4.0

AGENDA

- 6:00 pm** Registration & Refreshments/vulputate lectus.
- 6:45 pm** Opening Note | CIO Klub
- 7:00 pm** Technology driven Innovation for Manufacturing using PTC's IoT & AR
- 8:15 pm** Closing Note | CIO Klub
- 8:30 pm** Networking Dinner

Date

16th Feb 2018

Time

06:00pm to 09:00 pm

Venue

Fair Field Marriot ,
Coimbatore

This meeting is by invitation only . Not Transferable
