# Simply Cloud

## *Our Solution for*

<i>Assess</i>	<i>Migrate</i>	<i>Visualize</i>
Can I take it to cloud? Which cloud? How? At what cost? For what benefits?	Systematic, Repeatable, Reliable, Automated migration from on-premise to on-cloud	See the cloud, Literally
<i>Optimize</i>	<i>Modernize</i>	<i>Containerize</i>
Receive and act on best In class, real time advise, saving significant Dollars on a continuous basis	Re-deploy your app in multiple new ways deriving multi-dimensional benefits with zero code-change	Re-package your app and its dependents to nippy containers
<i>SaaSify</i>	<i>PaaSify</i>	<i>Meter</i>
Transform your single-tenant app multi-tenant SaaS, serving multiple customers from a single code base	Unchain your app from traditional on-premise databases and middleware. Take them to cloud.	Measure nearly anything and everything!
