## About Deloitte

“Deloitte” is the brand under which tens of thousands of dedicated professionals in independent firms throughout the world collaborate to provide audit, consulting, financial advisory, risk management, tax and related services to select clients. With over 150 years of hard work and commitment to making a real difference, our organization has grown in scale and diversity—more than 225,000 people in 150 countries, providing audit, tax, legal, financial advisory, enterprise risk, and consulting services—yet our shared culture remains the same.

## Risk Advisory

Deloitte's Risk Advisory helps clients focus on areas of increased risk, address the entire spectrum of emerging risks, including disruption due to innovation, cyber, geopolitical, and other trends; and pursue intelligent risk-taking as a means to value creation.

## Software License Management

Reducing costs, mitigating risk, gaining control

It's no secret that managing software assets can be a challenge. Multiple stakeholders are involved in the purchase, installation, deployment, maintenance, utilization, and disposal of software. The technologies involved are complex and constantly changing. Deloitte performs hundreds of license baseline reviews per year, and we have implemented Software Asset Management (SAM) programs for end-user organizations around the world. As a neutral third party, we provide a truly objective perspective on monitoring and governing software assets, helping companies obtain the accurate information they need to optimally license their IT landscape.
